THE O4 EXECUTION SCORECARD

A 4-Quadrant Diagnostic for Measuring Strategic Clarity vs Operational Friction

Execution velocity compounds faster than conceptual strategy. When a venture stalls, the bottleneck always sits in one of four chambers: Open, Obstacle, Observation, or Ownership.

1. OPEN (THE MARK) / 10

- ☐ **O1.1: Singular Mark**
  Can you state the exact economic outcome of this sprint in 1 sentence?
- ☐ **O1.2: Message Friction**
  Does your offer convert warm attention without a 30-minute explanation?
- ☐ **O1.3: Audience Target**
  Is the buyer persona an institutional decision-maker with budget authority?

2. OBSTACLE (FRICTION) / 10

- ☐ **O2.1: Systemic vs Human**
  Is the drag caused by missing tooling or missing founder conviction?
- ☐ **O2.2: First Down Mentality**
  Are you executing the immediate 10-yard gain instead of forcing a hail-mary?
- ☐ **O2.3: Kill Threshold**
  Do you have an explicit failure metric that terminates non-performing bets?

3. OBSERVATION (HARD METRICS) / 10

- ☐ **O3.1: Attributable Source**
  Can you trace every closed dollar to a specific inbound distribution channel?
- ☐ **O3.2: Unit Economics**
  Are contribution margins positive after factoring all agent & labor costs?
- ☐ **O3.3: Retention Signal**
  Are existing buyers expanding engagement or referring peer operators?

4. OWNERSHIP (ARCHITECTURE) / 10

- ☐ **O4.1: Decoupled Founder**
  Does the delivery mechanism run without your live manual intervention?
- ☐ **O4.2: Documented SOPs**
  Could an external operator run this trade tomorrow using written procedure?
- ☐ **O4.3: Clean Cap Table**
  Are entity boundaries, contracts, and IP ownership fully ratified?

TOTAL AUDIT SCORE

_____ / 40

DIAGNOSTIC BENCHMARK & ACTION THRESHOLDS:

[SCORE < 20] STRUCTURAL OVERHAUL: Stop marketing. The underlying operational trades are leaking.

[SCORE 20–30] BOTTLENECK OPTIMIZATION: Isolate the single lowest-scoring quadrant; run a 14-day sprint.

[SCORE 31–40] INSTITUTIONAL SCALE: Asset is hardened. Deploy capital and expand distribution volume.
